Summary:
Senior Backend Engineer with 6.5 years specializing in high-throughput Python microservices, distributed caching, and cloud infrastructure on AWS.

Skills:
- Languages: Python, Go, SQL, Bash
- Frameworks & Databases: FastAPI, Django, PostgreSQL, Redis, RabbitMQ
- DevOps & Cloud: AWS (ECS, RDS, S3), Docker, Kubernetes, GitHub Actions, Terraform

Experience:
Senior Software Engineer | FinStream Corp | New York, NY | 2021-02 - Present
- Architected transactional API gateway using FastAPI and Redis, reducing p99 latency by 44% across 20M daily calls.
- Scaled PostgreSQL database with connection pooling and query optimization, handling $4M+ in daily transaction volume.
- Led migration of 8 core services to Kubernetes clusters on AWS with zero downtime.

Backend Engineer | DataMesh Inc | Boston, MA | 2018-06 - 2021-01
- Developed distributed data ingestion services using Python and RabbitMQ, processing 1.2 TB of event streams daily.
- Automated CI/CD deployment pipelines using Docker and GitHub Actions, cutting deployment time from 45 min to 8 min.

Education:
M.S. in Computer Science | Georgia Institute of Technology | 2018
B.S. in Computer Engineering | Rutgers University | 2016

Certifications:
- AWS Certified Solutions Architect - Associate (2022)
